Zapp EVDO VS Orange 3G+

<http://forum.softpedia.com/index.php?automodule=blog&blogid=1&showentry=2802>

Locatie: Campul pipera, Cartierul Madrid

Acum ~ 6 luni am testat in exact aceeasi locatie Zapp EVDO si 3G Orange (proaspat lansat). Nu mai stiu valorile exacte, insa EVDO desi nu merge stralucit, era destul de mult peste Orange 3G.

In acest moment (si in utimele 4 luni) Zapp merge infect in nordul orasului, spre marea frustrarea a utilizatorilor.

Am cumparat un modem 3G+ Huawei E220 (cu firmware la zi) de la Orange si am testat performantele conexiunilor...

Modemul Huawei NU suporta HSUPA (viteaza de upload de pana la 2 Mbs).
Doar modemul ICON III suporta aceasta facilitate, insa nu merge cu routerul Asus.

Ambele modemuri au fost trecute printr-un Router Asus WL500W (port USB) cu firmware Oleg.

Am folosit 3 servicii de masurare a vitezei:

1. [Zapp Speed test](#)
2. [Getip.ro](#) - serviciu oferit de Softpedia.com, de pe serverele noastre de la GTS Romania
3. [Speedtest.net](#) - serviciu recunoscut, si am folosit serverul din Romania, recomandat de ei.

Iata rezultatele, in imagini si ca PDF

Zapp EVDO - modem Z020

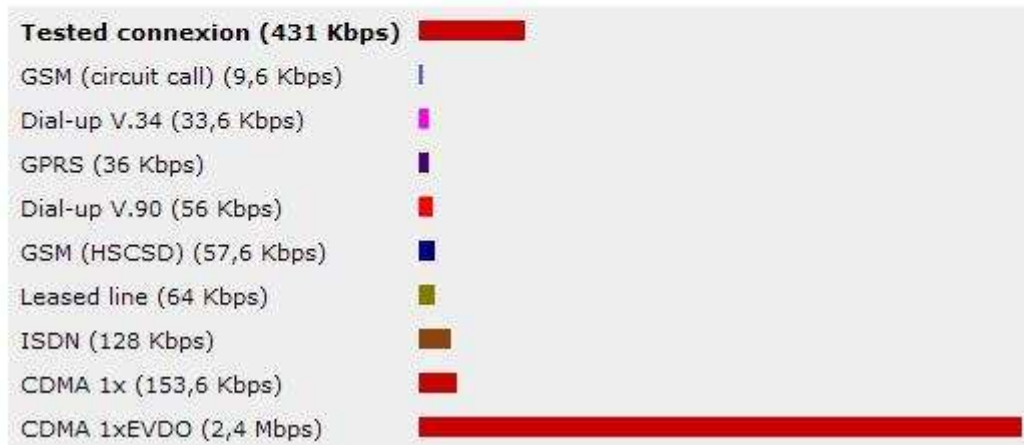

Zapp Speed Meter

441706.31 bites per second which means:
